WORK EXPERIENCE

Full Stack Developer

Paperless Hospital

Padang, Sumatera Barat

September 2024 – Present

As a Full Stack Developer at Paperless Hospital, I am responsible for designing, developing, and maintaining web applications.

Achievements

- Designed and implemented databases to support web applications.
- Built the frontend using technologies like HTML, CSS, and JavaScript with a focus on creating responsive and engaging user experiences.
- Developed the backend using frameworks like Laravel to manage business logic and provide APIs for frontend interaction.
- Performed routine maintenance and bug fixes to ensure the application ran smoothly and securely.
- Implementing integration (bridging) between SIMRS and E-Claim.
- Implementing integration (bridging) between SIMRS and Apicare.
- Optimizing data retrieval performance from the database.
- Updating code to the server.
- Managing the server.
- Configuring and managing Git.
- Collaborating with other programmers.
- Training users on how to use the website.
